Education

Jayaprakash Narayan College of Engineering - MBNR

(Dec 2020 - Present)

B.Tech. in Computer Science and Engineering

Sri Saanvi Junior College - MBNR

XII | MPC

Chaitanya Central School - MBNR

X (CBSE)

Academic Projects

- **Smart Attendance System Using Face Recognition**

Smart Attendance System Using Face Recognition is a modern technological solution designed to automate and streamline the process of taking attendance in various educational or organisational settings. This project utilises facial recognition technology to accurately identify and record the presence of individuals.

- **Indian Sign Language Recognition System**

An Indian Sign Language Recognition System is a technology designed to interpret and translate gestures used in Indian Sign Language (ISL) into spoken or written language, aiding communication between individuals with hearing impairments and those who do not understand ISL. Utilising computer vision and machine learning techniques, the system analyses hand movements, facial expressions, and body postures to recognize and interpret signs accurately. It aims to bridge the communication gap between the deaf and hearing communities, facilitating seamless interaction in various domains such as education, employment, and social interactions. This technology holds promise in promoting inclusivity and accessibility for individuals with hearing disabilities across India.

Technical Skills

Programming Languages: Python, HTML, CSS, Bootstrap, MySQL, DBMS & Java.

Technologies: Power BI, Git, Jupyter notebook, Pandas.

Certificate

- EY GDS - AICTE Full Stack Web Development.
- VERZEO - Machine Learning with Python.
- Internshala - Web Development Internship.

Hobbies, Languages & Other Skills

Hobbies: Reading Books, Watching Movies/Tv Series, Travelling, Badminton, Driving & Cooking.

Languages: English, Hindi, Telugu & Urdu.

Other Skills: Leadership Skills, Management Skills, Planning Skills & Speaking Skills.
